proxeo AURA **Air Polishing System**

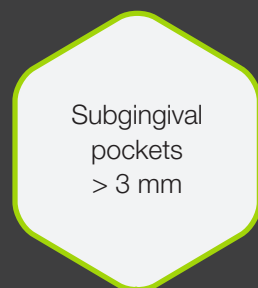

It's in your hands

The Proxeo Aura Air Polishing System is a real all-rounder. Soft deposits and stains can be removed thoroughly and efficiently without changing the handpiece. The powders, handpiece and spray heads work together perfectly and allow thorough and atraumatic supragingival and subgingival cleaning.

Supragingival,
sulcus,
subgingival
pockets < 3 mm

Subgingival
pockets
> 3 mm

Slender – almost like a perio probe

The sterile, slender perio tips allow you to work gently, even in deep pockets. Soft and flexible, they adapt perfectly to the periodontal situation. The lateral outlet directs the jet sideways, promoting atraumatic cleaning.

Controlled spray pattern

The optimally bundled powder jet with its focused spray pattern ensures controlled and efficient working. In addition, the powder is enveloped in a water jacket upon exiting, which reduces the powder emission.

Optimal adaptation

The 360° rotation function allows dynamic adaptation of the spray heads to the respective treatment position at any time.

Pretty angled

The special perio spray heads and the 90°- and 120°-angled spray heads in two different lengths ensure you are optimally equipped for all hard-to-reach areas.

The choice is yours

Set the right working pressure to suit the clinical indication using the adjustment ring and achieve brilliant treatment results every time.

- › Prophy: for efficient working in the supragingival region
- › Perio: for atraumatic treatment with glycine powder in the supra- and subgingival region

Convenient refilling

The side opening of the powder container means that instead of holding the handpiece when refilling, you can simply rest it on the table. This leaves both your hands free, making refilling of the powder much easier.

Problem-free workflows

The clear powder container allows you to check the powder level at all times, enabling you to integrate a powder change into your workflow with ease.

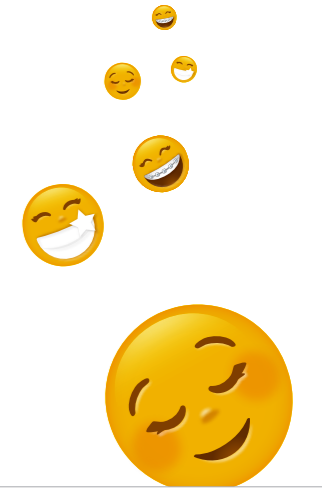

4 different turbine connections

The Proxeo Aura air polishing handpiece is available with connections for W&H Roto Quick, KaVo Multiflex, NSK and SIRONA. Simply connect it to the turbine hose and you're ready to start.

Air polishing handpiece PF-60

Air polishing with system

Whether you are working supragingivally, in the sulcus or in deep pockets, the combination of the right powder, the corresponding setting on the adjustment ring and the matching spray head ensures you always achieve optimal treatment results.

Application	Setting	Powder	Spray head
<p>Supragingival</p>	<p>Prophy</p>		<p>Standard Optional</p>
<p>Supragingival, sulcus, subgingival pockets < 3 mm</p>	<p>Perio</p>		<p>Standard Optional</p>
<p>Subgingival pockets > 3 mm</p>	<p>Perio</p>		<p>Standard Optional</p>

Proxeo Aura Air Polishing Powder

- › Based on sodium bicarbonate
- › Average particle size 40 µm
- › Mint taste
- › Packaging: 4 bottles of 250 g each

Prophyllaxis Powder SOFT

Removes supragingival biofilm and stains from the tooth surface gently and effectively.

INDICATIONS

- › Removal of extrinsic stains
- › Cleaning of fissures and cavities
- › Cleaning of orthodontic brackets

Prophyllaxis Powder SENSITIVE - Glycine Powder

Removes supra- and subgingival biofilm atraumatically.

INDICATIONS

- › Gentle removal of stains
- › Biofilm management of periodontal pockets
- › Periodontal maintenance therapy
- › Implant care and treatment of peri-implantitis
- › Cleaning of orthodontic brackets
- › Atraumatic cleaning of restorative materials
- › Minimally invasive on exposed tooth necks and dentine
- › Reduces burden with colonising bacteria

- › Based on glycine
- › Average particle size 25 µm
- › Sweetish taste
- › Water soluble
- › Packaging: 2 bottles of 160 g each

Clean and hygienic

Cleaning made easy

The special cleaning tools can be used to keep the handpiece and spray heads clean at all times.

Hygienic reprocessing

The handpiece can be simply wipe-disinfected. The removable spray heads are thermo washer disinfectable and sterilizable.

Sets for successful air polishing

Proxeo Aura Prophy-Set

- › Air polishing handpiece
- › 120° spray head
- › Prophylaxis Powder SOFT (250 g)

Proxeo Aura Perio-Set

- › Air polishing handpiece
- › 120° spray head
- › Spray head perio
- › 40 perio tips (subgingival)
- › Prophylaxis Powder SOFT (250 g)
- › Prophylaxis Powder SENSITIVE – Glycine Powder (160 g)

Technical data

Air polishing handpiece	CE 0297	
Operating air pressure bar:		2.2–3.0
Operating water pressure bar:		1.0–3.0
Weight:		155 g
Dimensions (W×D×H):		200×90×50 mm
Ambient conditions:		from +10°C to +35°C relative humidity of 30% to 75%
Type/connection:		PF-60/W&H Roto Quick, PF-60 M/KaVo Multiflex PF-60 N/NSK, PF-60 S/SIRONA
Air pressure P:		800 hPa/1,060 hPa

Spray heads:

Thermo washer disinfectable

Sterilizable up to the stated temperature

Perio tips:

Not for re-use

Sterilized with ethylene oxide

Sebastian Kritzinger

Product manager W&H, Bürmoos

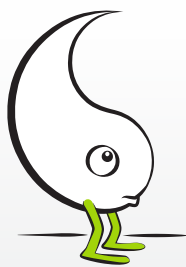

»Proxeo Aura stands for efficient air polishing. This system with an air polishing handpiece and the corresponding powders allows you to remove supra- and subgingival biofilm, as well as stains – thoroughly and under control.«

Babette McLaren

Dental hygienist, Munich

»The Proxeo Aura is easy to use, ergonomic and suitable for a wide range of applications. Perfect for efficient, supra- and subgingival air polishing!«
